Skills

Javascript ♦ Angular ♦ React / Redux ♦ HTML ♦
Node ♦ SASS ♦ MongoDB ♦ Ionic ♦ Gulp / Webpack

Experience

Jjump / Jr Software Engineer

Jul 2017 – Sep 2017 Lehi, UT

Built reusable front end components as well as restyled the current site including new graphs for analytics with new and more accurate data. Created endpoints for integrated social media and other third party API's. React/Redux and Node/Express.

Avantar / Front End Developer

July 2016 – May 2017 Orem, UT

Main Front End Developer working in AngularJS, jQuery along with RESTful API's creating web apps. Fully responsive and cross browser supported.

Projects

Sobox – web app www.sobox.co

Built entire front end for app with Avantar. Sobox is a reputation management system, created for small businesses to generate positive reviews.

DevMountain Companion App – mobile app

Mobile app built in Ionic for students at DevMtn to use while attending the cohort. Group project: Front End Angular project with RESTful api's.

Education
